

TECHNICAL DATA

Components	up to 14
Valves' Diameter	DN14
Dispensing Accuracy	1 g
Dispensing Container	20 L pail
Built-in Storage	14 S/S Canisters (4 x 10 L & 10 x 5 L)

TROLLEY

The InkMaker TROLLEY is a mobile automatic dispensing unit which helps managing colour corrections directly at the printing machine.

Fully automatic and easy to operate requiring minimal input.

The TROLLEY can formulate colour corrections through a spectrophotometer.

The system is operated through a notebook computer using **InkMaker software**.

InkMaker will **provide the connection** between our software and the colour matching software

Unit is fitted with **anti-static wheels**

Air and power supply is taken from the printing machine through **safe plug sockets**

Spectrophotometer (not included within InkMaker's supply) will be placed on the **TROLLEY**

Spectrophotometer's colour matching software (not included within InkMaker's supply) will be installed in the notebook

ADVANTAGES

Ability to move the mobile trolley unit close to the printing machines

Easy interface with any brand of spectrophotometer

Reduced press down-time due to colour matching

Right colour achieved even without the support of a colour matching specialist

Complete tracking of operation and ISO compliance traceability

Easy interface with any brand of spectrophotometer

Interface with the main dosing system

Optimized recycle-management with press return's corrections automatic update

Consumption reports

Automatic, real time formula update

Easy maintenance

Improved workplace cleanliness, tidiness and safety
